

Wessex Academic Health Science Network Conference 2016

Predict

Prevent

Adapt

Wednesday, 19 October 2016
11:00 – 16:00
St Mary's Stadium, Southampton

Agenda:

The day will feature a marketplace of NHS, university and small business innovators, interactive sessions on genomics, disruptive innovation, digital health and technology, and much more.

11am – 1pm

Marketplace, networking and a Randomised Coffee Trial:

The event opens with a large marketplace of NHS, universities, research bodies, commercial innovators and national organisations showcasing their fantastic work. This is a great opportunity to learn about innovation taking place across Wessex and from further afield. We will also be running a Randomised Coffee Trial during the networking time, as part of the national Fab NHS Change Day, which is also taking place on 19 October. Lunch, tea and coffee will be served during this time.

1pm – 4pm

The afternoon is jam-packed with Q&A, breakout and fantastic sessions

Science Network

Agenda:

1 – 1:10pm

Welcome and introduction by Bill Gillespie, Chief Executive, Wessex AHSN

1:10 – 2:10pm

Session one: **Predict**

For years, policy makers and commentators have been talking about a shift from reactive, sickness-focused health care models to predictive, preventative models. Is this beginning to happen? Learn about two key drivers: developments in genomics (Dr Catherine Mercer) and the use of predictive analytics to support secondary prevention of alcohol-related liver disease (Professor Nick Sheron).

Q&A session: Professor Karen Temple, Dr Catherine Mercer and Professor Nick Sheron

2:20 – 2:55pm

Breakout sessions: **Prevent**

Moving interventions upstream to support health and wellbeing, and prevent further complications from existing conditions, is the Holy Grail of healthcare. Here is an opportunity to learn about innovative approaches in a choice of two breakout sessions:

Integrated long-term condition management (Mission ABC)

Professor Anoop Chauhan

or

Managing co-morbidities: polypharmacy comparators

Clare Howard, Wessex AHSN clinical lead for medicines optimisation

3 – 4pm

Session three: **Adapt**

History has seen many revolutionary periods of time, where technology and innovation fundamentally shape and change the way people live. You could argue the digital revolution is happening now. So-called “general purpose technologies” are disrupting whole industries. Can the NHS in Wessex embrace disruption?

Four innovators talk about their experience, and Fiona Driscoll, Wessex AHSN Chair, guides the discussion:

xim and MyMHealth: 3 – 3:20pm

Q&A panel: 3:20 – 3:30pm

Inclusive Media Solutions and ADVault: 3:30 – 3:50pm

Q&A panel: 3:50 – 4pm

4pm

Close

Closing remarks and summarising by Fiona Driscoll, Chair, Wessex AHSN
