

Respiratory: improving lung health across Wessex

What was delivered in 2016/17?

- Successfully planning and beginning to deliver an ambitious new way of treating patients with respiratory problems
- Achieving support from local primary care participants and vanguard partners
- Creating champions for the model and maximising opportunities for future spread
- Securing additional investment and support from technology partners and pharma
- Generating interest and national recognition e.g. HSJ award
- Securing additional support for spread from The Health Foundation
