

Atrial Fibrillation Programme

The AHSN Network 18/19

DETECT: To improve diagnosis of those at high risk of AF-related stroke

AF cumulative number of patients added to the AF register - England

Additional
61,406 people
detected and added
to AF register
in 18/19

Expected
to achieve
85%
National AHSN
target by 2020

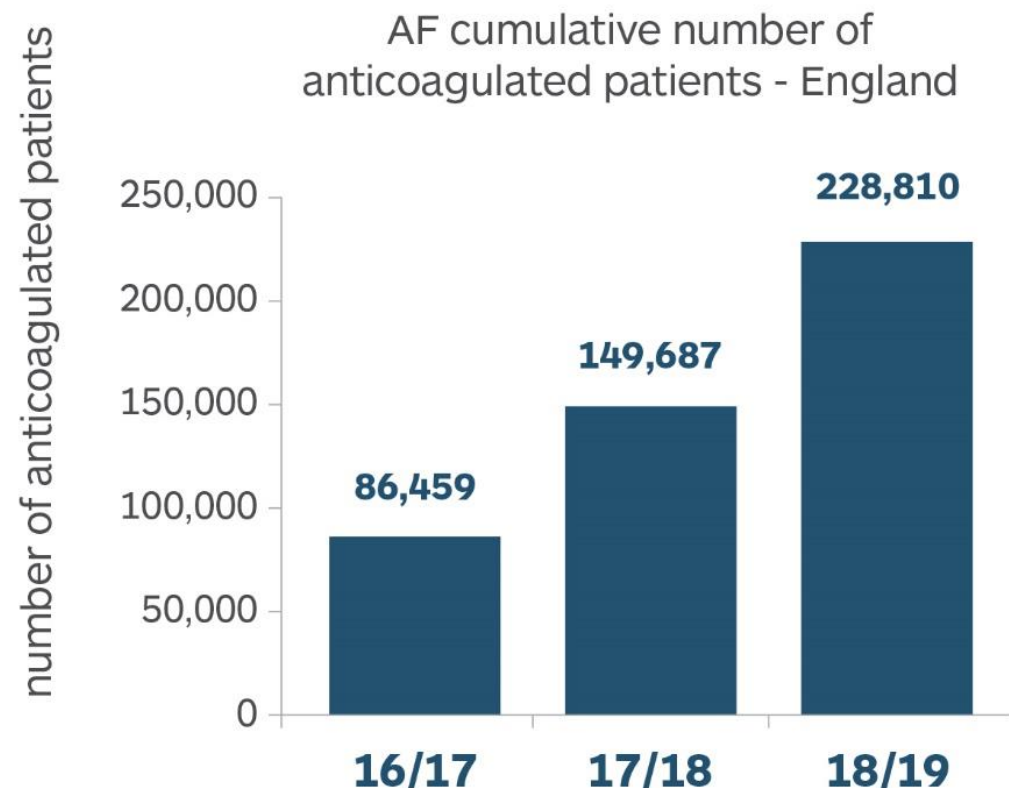

6,000
AF detection
devices distributed
throughout NHS

Year on year
comparisons consist
of different methods
of analysis and
includes changes
in CCG boundaries
and populations

Atrial Fibrillation Programme

The AHSN Network 18/19

PROTECT: To improve management through anticoagulation treatment

Additional
79,123 people
receiving
anticoagulation
treatment
in 18/19

3,165
AF-related strokes
avoided*

791
lives
saved**

72%
of CCGs achieving
or exceeding 84%
anticoagulation
rate

* Stroke calculation is based on 1 avoided stroke for every 25 detections

** Calculation of deaths avoided is based on a stroke fatality rate of 1 in 4
