## Life QI

Life QI is an online quality improvement (QI) platform that makes it easy for teams and organisations to run QI projects and to report on QI activity.

Life QI is helping to connect people across health and care in the areas of innovation, quality improvement and patient safety by supporting improvement work and is at the heart of the Wessex Community of Safety and Improvement Practice (CSIP)

Life QI was developed by Seedata Ltd in partnership with South West AHSN, and is now widely used across the UK. Wessex AHSN is delighted to support the use of the LIFE QI system across Wessex.

## What does Life QI do?

Life QI supports QI teams to plan, monitor and report progress of their improvement projects, as well as connect with other members of the QI community.

Based on the Institute of Health Improvement's (IHI) Model for Improvement, Life QI helps teams to create Driver Diagrams; document Change Ideas and PDSA cycles; generate SPC charts and produce Progress Reports.

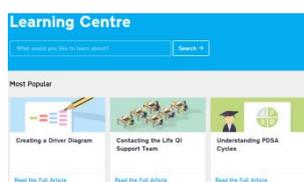

Life QI also enables improvers to search for, and connect with, other teams and individuals within your organisation or across the country who have shared interests and/or are working on similar projects.

## Obtaining a user licence for the LIFE QI system

Many NHS and non NHS healthcare organisations across Wessex have a corporate licence to use the LIFE QI system. Access to the system is potentially available to everyone interested in healthcare improvement.

If you are interested in obtaining a licence to use the system you can apply by going to the LIFE QI website at: <https://uk.lifeqisystem.com/login/> and selecting the "Don't have an account" option. You will then be contacted with relevant information about registering as a LIFE QI user.

## Using Life QI

More information about Life QI, including tips on how to use it to manage QI projects can be found in the learning centre at: <https://www.lifeqisystem.com/learning-centre/>.

Life QI only collects information to support improvement projects; it is not designed to collect detailed information on users, organisations or patients.

Users must comply with the LIFE QI terms and conditions and follow their own organisations information governance (IG) and data security policies at all times.

Life QI can be contacted via their website at <https://www.lifeqisystem.com/>
