

Implementation pack resources: MDT (Multi-Disciplinary Team) approach for those living with moderate or severe frailty in the community

This toolbox of implementation resources has been developed as a quick and easy reference guide summarising lessons learnt during the development of an MDT approach in Wessex (November 2020- May 2021). Compiled by Wessex AHSN Healthy Ageing team, it has been developed for health and social care professionals and those commissioning MDT services for people living with moderate or severe frailty in the community.

This document will be updated as new best practice examples emerge. For further information or to share your best practice examples, please contact the Healthy Ageing team at healthyageing@wessexahsn.net

Resource	Description	Link
1. Journey of developing a Wessex MDT approach	A systematic representation of the PDSA cycles involved in developing the Wessex MDT approach for those living with moderate or severe frailty in the community	Journey of developing the approach
