

# FeNO data collection template – Guidance for non-Ardens sites

The FeNO programme has developed Ardens templates to support the use and data collection for FeNO testing data.

These templates are only available to EMIS and TPP users – they are not available to MicroTest and Vision users or project teams who do not use such systems.

**An Excel based reporting template has also been developed as an alternative for sites who cannot use Ardens. Downloaded [via this link](#).**

## **This guide describes:**

1. Purpose of the data collection
2. Supporting Data Protection Impact Assessment (DPIA)
3. Cost (free of charge)
4. How to download the templates
5. The data submission process
6. Further FeNO resources

## **1) Purpose**

This reporting template is to:

- **Support data collection** for Pathway Transformation Fund projects (both open and bundle awards) and project impact evaluation
- Enable general **data collection for any practice wishing to use FeNO** testing – regardless of whether they are part of a Pathway Transformation Fund project.

## **2) Supporting Data Protection Impact Assessment (DPIA)**

To support data sharing, we have made a DPIA template available to download via the FeNO toolkit (from the Toolkit's Ardens page) – accessed [via this link](#).

This template should be completed locally and a decision made to share the data via your existing IG governance routes.

### 3) Costs

Available **free of charge to all**.

### 4) How to download the templates

Download from the FeNO Toolkit website – [via this link](#).

### 5) The data submission process

Accelerated Access Collaborative (AAC) Pathway Transformation Fund (PTF) projects are asked to **submit data collected via the Ardens templates to NHS England on a quarterly basis** as part of their project participation. Projects will also be expected to use this data (Plus any other relevant data described in your bid) as part of their end project report.

**Data use** – NHS England will use the data as part of project impact reporting. NHS England will share the data publicly, but all data will be anonymous and aggregated (i.e. number of FeNO tests per month).

#### **Submission process:**

1. Collect data locally
2. Translate the data into this spreadsheet - in aggregate figures
3. **Send via NHS.NET email** (only) to [england.irlsanalytics@nhs.net](mailto:england.irlsanalytics@nhs.net)  
Please use the subject “FeNO quarterly data – Quarter [x] – [your site name]”

***NOTE - only aggregate data should be shared with the NHS England AAC team - do not share patient level or identifiable data***

### 6) Further FeNO resources

This guide, the resources named above, and all other FeNO toolkit materials can be accessed via the FeNO toolkit [here](#)
